The Barker Weeder and Mulcher.

It operates on the plan of a lawn mower. It is better than a hoe. It is ten times as fast. It is easy to operate. It forms a dust mulch. Buy a Barker Weeder and Mulcher and cut your garden the same as you buy a lawn mower to cut your lawn. Cut your weeds in your garden **once a week**. It cuts the weeds under the ground as well as the weeds out of the ground. It pulverizes the ground fine which holds the moisture to feed the plant.

To appreciate the value of this tool you must take it to the field, you cannot judge it properly by looking at it. Take it out into the patch, pick out a piece of vegetation that needs weeding. Notice the work it does. Let your man work it. If you are not satisfied with it after giving it a fair trial, you can return it. Hundreds of the best market gardeners and onion growers have taken this tool to try and have kept it and bought more. It is a money saver.

It costs thousands of dollars annually to weed onions and other market garden crops. The machine that can do the work best in the shortest time saves the most money for the grower. **EVERY CENT SAVED IS GAIN.**

BARKER WEEDER—Front View.

The revolving blades of the Barker do far better work than the stationary bolted knives used on other machines. With the revolving blades of the Barker the surface of the ground is chopped, the weeds are cut, separated from the soil and thereby destroyed. With the bolted knives used on other weeders, the knife slips under the weeds oftentimes leaving them standing without disturbing the earth that hangs to the roots, and the weeds thus left start right in to grow again.

Fairbury, Neb., January 3, 1906.

Dear Sirs. In regard to your Weeder and Mulcher, since we have yours in the nurseries the men will use no other make of wheel hoe, as they can do more work easier with yours.

Very truly yours,

GALBRAITH NURSERIES.

All gardeners know that onion sets is an expensive crop to weed.

Our Mr. S. F. Leonard has had more practical experience as a grower of onion sets than perhaps any other individual in the seed trade, and this is what he says of the Barker:

"When I first saw the Barker Weeder and Mulcher I did not think it would do any better work than some others that I already had in use. I was impressed, however, by its peculiar construction and decided to give it a trial. We had thirty-five hand cultivators going on our onion set farm the day I took the Barker tool out. On my way to where the force was working I had a chance to try the tool in several different places and became satisfied that for our work it beat anything we had. In order to test it alongside of the others I called the foreman and bid him take the Barker and accompany some of the best hustlers who were working other tools. It took him a little time to get the hang of the Barker, but as soon as this was accomplished he clearly demonstrated that two rows could be done as easily with it as one could be done by any of the others. I therefore secured a quantity of the Barkers and used them in place of the others with much gain. change of tools was made and I am fully convinced, that had I secured the Barker tools at the beginning of the season, our expense for weeding would have been cut in half. My recommendation of this tool to other large growers induced them to try it and they found it as satisfactory as I did. It will do excellent work in all market garden crops."

THE BARKER IS EASY TO PUSH.

It was well on toward the end of the weeding season when this was written. I secured the Barker tools at the beginning of the season, our expense for weeding would have been cut in half. My recommendation of this tool to other large growers induced them to try it and they found it as satisfactory as I did. It will do excellent work in all market garden crops."

You do not have to draw the Barker Weeder back after each forward motion like you do other hand wheel hoes. It is a steady forward push like running a lawn mower. You can walk fast or slow, as best suits you.

With the Barker you do the work better, quicker and save yourself the extra labor of the see-saw motion that is necessary to do effective work with any of the other hand weeders.

University of Nebraska Agricultural Experiment Station.
Lincoln, June 29, 1904.

Gentlemen: After having your Weeder and Mulcher in use at the Nebraska Agricultural Experiment Station for some weeks, after having personally tested it, I am convinced that it is the best implement for weeding and cultivating vegetables and other similar plants that I have ever seen. We are using it to the practical exclusion of other implements in our garden and nursery work.
R. A. EMERSON, Director.

The Barker is made in 3 sizes. Viz.: 6-inch cut, 8½-inch cut, and 11-inch cut. Each machine is fitted up with leaf guards and tooth attachment. The 8½-inch cut is the standard size for onion sets and ordinary market garden crops. The 6-inch is for lettuce and crops that are planted in close rows. The 11-inch for crops that are planted from 14 to 18 inches apart in rows.

Either Size Complete with all Attachments.....Price, \$5.00

BARKER WEEDER—Back View.

OUR reputation has been built up by furnishing seeds of the best quality as to purity and germination, and we shall always endeavor to furnish THE BEST SEEDS that can be procured, and make prices as reasonable as possible.

WE ARE in a position to furnish good seeds at as low figures as any reliable house. We can and will meet all prices made by any one offering goods of equal value with ours, but we have no ambition to compete with those offering inferior stocks.

Market Gardeners' Price List.

THE SEEDS quoted herein are for Market Gardeners. The list embraces all the best varieties and is issued to meet the needs of planters in every market gardening section EAST, WEST, NORTH and SOUTH as well as for the especial requirements of OUR OWN CHICAGO GARDENERS. Our position as MARKET GARDENERS' SEEDMEN is well and favorably known both at home and throughout the country. Our pre-eminent standing in this line of the Seed Business has been long established. The Market Gardener, when he plants LEONARD'S SEEDS, may therefore feel reasonably sure that he is planting the best seed obtainable.

INSTRUCTIONS FOR CUSTOMERS WHO ORDER BY MAIL.

We make no charge for cartage, bags, boxes or packing, but at these prices (except where noted otherwise) buyer must pay all Express or Freight Charges. Small parcels can go by mail if purchaser desires it. In such cases 10 cents for each pound and 15 cents for each quart must be added to these prices to cover postage. Half bushels are sold at bushel rates, and one-half pounds are sold at the pound rates.

These prices are subject to change as season advances, depending on shortage or surplus of stock.

WHEN TO ORDER. We are prepared to fill your orders as soon as this catalogue reaches you, so please order early.

ABOUT FORWARDING. Every order is executed at once upon its receipt, or a reason given why it has not been sent, so that parties ordering may know that if goods are not received in proper time, it is almost certain that the letter has not been received by us.

SEEDS ARE GUARANTEED to arrive safe and in good condition, due care having been given to observe faithfully the previous and following suggestions, in all cases where the order is accompanied by the necessary remittances.

NAME AND ADDRESS should be written as plainly as possible, and care exercised to have place of residence, county and state in full, giving all shipping directions. This is imperative and of vital importance, as we frequently receive orders and letters desiring information, etc., without any signature, or wanting in some other particulars, to which, of course, we are unable to respond. Thus, what may sometimes appear to be negligence or error on our part is very often due wholly to lack of care on the part of our customers.

While we exercise great care to have all seeds pure and reliable, we sell no seeds with warranty expressed or implied in any respect, and are not in any way responsible for the crop. If the purchaser does not accept the seeds on these terms, they must be returned at once.

CABBAGE—SPECIAL STOCKS

LEONARD'S FAULTLESS CABBAGE

LEONARD'S FAULTLESS CABBAGE

IS NOW AND FOR TEN YEARS
HAS BEEN THE FAVORITE
SECOND EARLY CABBAGE
AT CHICAGO.

The product of this seed out-sells any other second early cabbage two to one on the home market. It can be marketed in the early summer; during midsummer, in the fall and early winter, making it the best all purpose variety ever introduced. It is popular alike with the grocer, kraut maker and shipper. It is possessed of earliness, large size, compactness and will produce more salable heads to the acre than any other stock we know of. It is of the succession type, but is earlier, head is rounder, sits out of the under leaves higher, has a darker color of leaf and can be planted closer. Pkt., 10c.; oz., 25c.; $\frac{1}{4}$ lb., 60c.

There is no Substitute for this Cabbage, the Strain is Distinct and can be had from one source only.

Pound, \$2.00

THE HOLLAND CABBAGE

LEONARD'S STRAIN.

THE HEAVIEST CABBAGE FOR THE SIZE OF
HEAD EVER INTRODUCED.

This cabbage in many localities is the most popular for winter and early spring marketing. It is heavy and remains solid longer than any other long keeping cabbage. For winter shipping it is unsurpassed. The main question for the grower to solve is where to get the genuine seed, for the popularity and paying qualities of the cabbage itself, when it is right, are points long ago decided.

Seed of the true Holland Cabbage is not plentiful; it is produced on a limited area at one or two points only. Seed grown anywhere else deteriorates, fails to show up the proper characteristics and is but a very unsatisfactory substitute. Since 1896 we have succeeded in securing the seed crops of a grower of this cabbage which for uniformity have met the requirements of the large cabbage growers of Chicago, Racine and other Holland cabbage shipping points, and which have made for us a reputation for handling the best strain of this imported article. We introduced the seed as **Leonard's Strain** and our sales are only limited by the quantity of seed our grower can produce. We do not hesitate to say that Leonard's strain of Holland cabbage is the purest to be had. Pkt.; 10c., oz., 25c., 1-4 Lb., 60c.

Per Pound, \$2.00

The Holland Cabbage

SHORT STEM STRAIN.

This strain of Holland Cabbage differs from the original Leonard Strain in the height of the stem only. In all other respects it is the same. It has been bred up to meet the requirements of the grower who works heavy, rich land. The long stem of the original strain in extra heavy soil has been thought to be something of a fault and the growers have been calling for a stock that would retain all the good points of the original with the additional advantage of dwarfer habit. We confidentially recommend this strain as being an ideal stock to all growers who deem their soil over-rich for the original long stem strain. We also recommend it for trial to all growers of Holland Cabbage. Pkt., 10c.; oz., 25c.; $\frac{1}{4}$ lb., 60c.;

Per Pound, \$2.00

GLORY OF ENKHUIZEN

This is an excellent mid-summer variety. It comes in about a week earlier than all seasons, makes a nice large head, has few outer leaves and can be planted close. Our tests show it to be worthy of a place among the new varieties of merit and we can recommend it as a good addition to the list. Pkt., 10c.; oz., 25c.; $\frac{1}{4}$ lb., 75c.;

Per Pound, \$2.50

GLORY OF ENKHUIZEN.

CAULIFLOWER.

LEONARD'S SNOWBALL CAULIFLOWER.

Photograph of Three Average Heads.

Grown by Wm. Rudenga, a successful Chicago gardener.

NOTE THE PRICES: Mailing pkts., 15c.; $\frac{1}{4}$ oz., 65c.; $\frac{1}{2}$ oz., \$1.25; oz., \$2.00; $\frac{1}{4}$ lb., \$8.00; lb., \$32.00. These Prices for the Danish Dry Weather also.

DANISH DRY WEATHER.

We take pleasure in introducing this Cauliflower to our customers. It is from one of the best growers in Denmark and we recommend it highly to market gardeners for trial. It is claimed to be a splendid strain for a dry season and equally good in all weathers—From the reports we hear regarding this stock from gardeners who tried it last year we consider it a valuable addition to the list and a worthy companion to Our Famous Snowball.

NOTE THIS TESTIMONIAL.

Utah, Oct. 20th, 1906.

Leonard Seed Co., Chicago.

Dear Sir: Are you going to have any more of that **DANISH DRY WEATHER CAULIFLOWER**? If you are, please hold me one pound. I tried it this season and found it to be the best I have ever planted in this dry climate. I am growing late Cauliflower for pickling purposes and the dry weather stock is just what I want as it heads all in a bunch, just when the pickling season is on and before the frost takes the cucumbers.

W. S. JENKINS.

"Leonard's seeds are always the best. Your Snowball cauliflower is ahead of any strain of that important variety that I have secured in my twenty-eight years' experience in gardening."

GEO. FERGUSON.

"I had the largest and finest cauliflower on the market last year. I raised it from your strain of Early Snowball. It is the best Snowball seed I ever planted."

G. BRAMBERGER.

DANISH DRY WEATHER CAULIFLOWER

"I am fully satisfied with your cauliflower seed."

FRED HINE.

"Your Snowball cauliflower is all right, and I think there will be a larger demand than ever for it next spring."

MARTIN HOCKSTRA.

"Your Snowball cauliflower seed gives more plants and more fine heads to the ounce than any other. It is the best Snowball cauliflower"

Chicago Gardeners.

Superior stocks are necessary to the prosperity of the Market Planter. The inferior article may be more attractive at the beginning because it costs less but the Superior Seed gives the more valuable product. :: :: :: :: :: :: :: :: :: :: :: :: :: ::

TWO WONDERFUL NEW PEAS

Leonard's Clatawa. "Clatawa" is Chenook Indian for get up and get. It describes in a word the main characteristic of this wonderful new Pea. The Clatawa is as early as American Wonder and bears pods like the Telephone, which certainly proves it to be a "get up and get" article. Its stocky vine and dwarf habit puts it ahead of anything thus far brought out in the class of early wrinkled peas. Earliness combined with productiveness large pods grown on a short stocky vine is what makes the Clatawa unique among wrinkled peas. It will be a satisfaction to the market gardener while he picks it, and a source of profit when he sells it. Pkt., 10c.; 3 for 20c.; $\frac{1}{2}$ pt., 25c.; pt., 35c.; qt., 55c.; postpaid. Pk., \$2.00.

LEONARD'S CLATAWA.

Leonard's Potlatch or Big Dinner Pea. "Potlatch," is Chenook Indian for big dinner. The way this pea shells out gives promise of more than enough to go round hence the name, Potlatch. It is a wonder in productiveness. The seed is green, similar to Pride of the Market though somewhat more rounded. It matures as early as Premium Gem, and like our Clatawa has pods like the Telephone. Its vines grow from 15 to 18 inches in height, with dark green foliage; the growth of the vine is sturdy and the pods are borne in pairs. No variety known will produce more pods, and no pods could possibly shell out better. The Potlatch is a variety from which any one may expect great things. We consider ourselves very fortunate in having secured it, and we think it well entitled to its Indian name. We can offer it as follows: Pkt., 10c.; 3 for 20c.; $\frac{1}{2}$ pt., 25c.; pt., 35c.; qt., 55c.; 2 qts., \$1.00, postpaid. Pk., \$2.00.

LEONARD'S POTLATCH.

LEONARD'S GLOBE ONIONS

LEONARD'S YELLOW GLOBE

Leonard's Yellow Globe. The most popular onion seed for a market crop at Chicago is Leonard's Yellow Globe. The soil around Chicago is particularly adapted for onion growing. The size of the town makes a large market. The high price is paid for the best article, consequently seed that produces the best onion is the most popular.

It is the same in any other growing section where a yellow skinned sort is needed. A trial of our Yellow Globe Seed is sufficient to make good our claims for it as superior, uniform and paying stock of onion seed. Pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.50; 10 lbs., \$25.00.

The Onion Seed Specialties here offered are worth many times their cost to any market grower, and the satisfaction they will give to the consumer will increase the profits of the gardener who grows them.

LEONARD'S RED GLOBE

Leonard's Red Globe. The deep dark red color of our Red Globe is one of its superior points, while in shape and size it is a counterpart of our popular Yellow Globe.

In the Michigan, Indiana and Ohio onion sections as well as in Illinois and Iowa this strain of Red Globe produces the prize-winning red onions.

Where competition is keen it will pay large returns for the additional cost of the seed. Pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.50; 10 lbs., \$25.00.

LEONARD'S WHITE GLOBE

Leonard's White Globe. White skinned onions when successfully grown are by all means the handsomest and will usually bring more money per bushel than either of the other colors. It is harder to grow them to perfection than red or yellow, but many large growers score big returns from a crop of whites. This strain of White Globe is uniform in size and shape with our Yellow and Red Globe. Pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 90c.; lb., \$3.00; 10 lbs., \$29.00.

LEONARD'S THREE GLOBES

LEONARD'S THREE GLOBES bring more money to the onion grower and sell quicker than any other varieties. Our Yellow Globe is the Standard Yellow, our Red Globe is the Standard Red and our White Globe is the Standard White.

Hundreds of carloads of onions grown from these stocks are shipped annually from the principal onion growing centers. Onion growers should plant the kinds that sell quickest and bring the most money.

This printed on green
is our Seal Trade
Mark.

STRINGLESS GREEN POD BEAN.

This New Bean produces a vine similar to Red Valentine, but develops pods to edible condition two to three days earlier than Valentine; that is to say, in thirty to thirty-one days from germination, which extraordinary maturity for table at once advances the Stringless Green Pod to the first rank among table beans. The pods are green, not quite so round as Valentine and less curved. The pods are stringless—absolutely so—this quality at once placing the variety at the top of the list among table beans

Thomas Laxton. This is a splendid pea. The pods are nearly as large as those of Gradus, maturing in about the same season, while in productiveness the Thomas Laxton excels all other extra early wrinkled sorts. Vines similar to those of Gradus but darker in color. Pods large, long, with square ends, similar to those of Champion of England but much larger and darker. Although only recently introduced this variety has come rapidly into favor with market gardeners. Our stock has been carefully selected. The most critical growers will be pleased with the results obtained from planting the seed we offer. As a very superior pea we unreservedly recommend the Thomas Laxton.

Pk., \$1 50; bu., \$6 00.

SPINACH.

Long Standing. An Improved, round seeded strain of excellent merit, having all the good qualities of other sorts and continuing in condition for use much longer. The leaves are smooth and very dark, rich green. Very popular with market gardeners.

Prickly or Winter. 12 1 00 10 00

Round Leaved. This variety is generally preferred in the north for early spring sowing, and is the most popular with our market gardeners. The leaves are large, thick and fleshy. Though not quite as hardy as the Prickly Winter, it stands the winter very well

Leonard's Warty Hubbard, also called Warty Hubbard and Chicago Warty Hubbard. This strain of Squash was introduced by S. F. Leonard in 1894. It originated with John Oly, an old-time Chicago market gardener, and for years previous to its general introduction to the trade was known at Chicago as Leonard's Warty Hubbard, which is its proper name. Ours is headquarters seed. .

Leonard's Victory Model Seed Drill.

A Model of perfection and neatness, built in a most substantial manner. Seed Hole may be regulated to a nicety by a simple thumb bolt. It Sows with precision Beet, Carrot, Onion, Turnip, Sage, Radish, Lettuce, Peas, Beans, Corn and all garden crops, and seed drops in plain sight of the one who operates it, and is then covered and rolled. The Flow of Seed may be instantly checked by swinging up the cut-off that is attached to the handle. The names of the Seeds are in plain sight on the right hand side of the seeder and the index points to the kind of seed that it is desired to sow. It is a Market Gardeners' Seed Drill, made especially for this purpose on plans that will meet every requirement. It has no complicated parts, it can be used by anyone and is made so that the one who is using it will know that it is sowing the seed all right without any guesswork. Any one who has a garden, no matter how small, will find that this Seed Drill will save them both labor and money.

Price \$5.50 on the cars at Chicago.

LEONARD'S VICTORY MODEL SEED DRILL.

Leonard's Defiance Cultivator.

This new cultivator will take the place of the Old McGee which we introduced to the Chicago market gardeners about 20 years ago. This new machine is an ideal one for the straddle row process of cultivation. The Side Springs make it flexible and when the cross bar is taken out from between the handles it can be worked up to and away from the row as needed. By fitting the cross bar in again it can be made stationary and can be worked like any other two-wheel hand cultivator. This combination of a movable and fixed tool all in one is a great advance over anything in the line of Hand Cultivators thus far brought out. We have tried this New Tool in all ways and can recommend it fully to all who want a satisfactory working Hand Cultivator. We put the price right down to the lowest limit so that any one who has even the Smallest Garden can afford to have a cultivator to weed it with.

Price \$4.00 on the cars at Chicago.

LEONARD'S DEFIANCE HAND CULTIVATOR.

Broadcast Seeders.

THE CAHOON. This well known broadcast seed sower is considered among the best. It is easily worked and sows timothy, clover, flax, wheat, oats, rye, barley, all kinds of grass, and may be used by the gardener for spinach seed or any other kind which he may wish to sow broadcast. Each, \$2.75.

THE GRANGER. This sower is similar to the Cahoon in size and general appearance. It works easily, is of strong make and will sow evenly and satisfactorily grain, grass, clover and all farm seeds which are sown broadcast. Each, \$2.00.

THE CYCLONE. A seeder which is becoming very popular. It differs from the above mentioned kinds in construction, but does about the same work. It is a cheaper machine and a good one. Each, \$1.50

CAHOON SEEDER.

THE CHICAGO.

This is the best of the fiddle-bow seeders. Thousands of them are in use, and they give the very best of satisfaction.

Each, \$0.90.
